

COMPOSITE ENTRY DOORS

OFFER 2018/2019

WARM

DURABLE

SAFE

Brand - promise fulfilment guarantee.

VIKKING Composite Doors is a guarantee of the highest quality for generations

We have created from scratch innovative composite doors of the highest quality and durability.

Regardless of the statutory requirements of consumer protection in the form of warranty for faults and liability for non-conformity of the product with the agreement - we take the challenge of granting the extended warranty for trouble-free operation:

25 years	Composite sashes - lines ARCTIC PLUS and ARCTIC
20 years	Composite sashes - line PREMIUM
15 years	Composite sashes - line BASIC
10 years	PVC frames, hinges and locking plates
5 years	Paint coatings and stained glass units
3 years	Stripe locks and technical efficiency of other components

Clear rules

Ensuring the technical functioning is conditioned by:

- I - correct, adequate to operating conditions selection of doors lines and its equipment
- II - the use of composite door in accordance with its intended use
- III - the correct installation of the door by authorized installers with use of warm assembly according to the manufacturer's guidelines
- IV - making periodic checks, adjustments and maintenance according to the manufacturer's guidelines
- V - immediate removal of possible faults, that will protect against further damage of the door
- VI - the use the door in the segment of individual housing construction, for other applications, apply the standard 3-year warranty

The full content of the guarantee and guidance on quality acceptance, correct installation, operation and maintenance we attach to each product in the language of country of destination.

We provide warranty and post-warranty service.

Personalized solutions in joinery is our speciality.

You don't have to settle for compromises no more!

Not all suppliers are able to meet the stringent requirements for the highest aesthetic of doors combined with the best protection of your home.

We have developed from the scratch innovative composite doors to meet your most demanding expectations.

Advanced technology and innovative solutions enable to make any door of your dreams without any concessions in quality and durability!

No other doors have as many advantages, without defects and limitations associated with traditional technologies, composite doors are resistant to adverse weather conditions, don't absorb the moisture, don't corrode and retain consistently high quality for decades.

For years, our motto is:

"What for others is unusual - we treat it as a standard, what for others is impossible - we make it tomorrow".

For years, VIKKING is specializing in the implementation of most custom orders.

Unleash your creativity from the threshold and start by changing the door.

Choose your style, any combination of colours and surface textures of doors, choose most convenient handles and beautiful stained glass packets, we will take care of the rest with the greatest reverence.

To ensure the transparency of our extremely rich offer, this publication will make it easy to choose the door, this publication will make it easy to choose the most suitable door in terms of lines, collections, models and equipment.

Four product lines divided in to two collections, not limited by imagination, number of models and stained glass noble patterns, it is unquestionable advantage of VIKKING composite doors.

Be open for new possibilities!

PROTECTION OF YOUR HOME

- effectively protect against the heat loss - U_0 factor from **0,60 W/m²K**,

INFORMATION SYSTEM ■ VARIANTS OF DECORATIONS AND APPLICATIONS

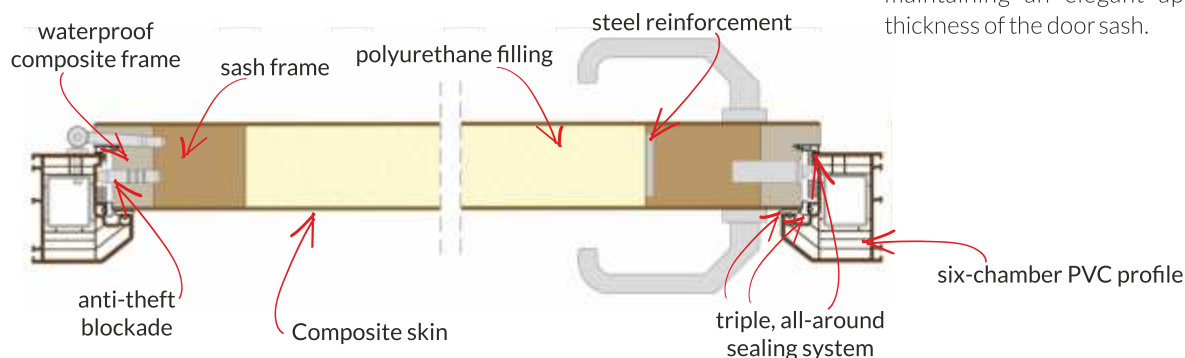

- | | |
|--|--|
|  RAL colours |  PL Inox strip on top |
|  Woodgrain colours |  LC Inox plinth (on top, height 90 mm) |
|  SMOOTH Smooth door surface |  KW Interior composite frame |
|  RW Real Wood surface (structure of precious wood) |  ZW Both sided frameless system |
|  STONE STONE application - onesided |  RR Decorative door frame from classic collection |
|  3D 3D application |  RZ Flushed Inox frame |
|  F Milled sash surface decors - onesided |  RN Inox frame on top |
|  FL IFlushed Inox strip |  KZ External composite frame |

Perpetual application possibilities, perfectly highlights aesthetic door qualities and give them individual character. You choose how your doors will look at the end.

- 1** Innovative, six-chamber PVC door frame class A Plus with smooth surface or RealWood. PVC profiles are resistant to moisture, perfectly insulate from the cold and require no maintenance. Extension system, connectors and clamps provide any configuration and frames equipment.
- 2** Composite sash with specially reinforced construction which prevents deformation, even in difficult weather conditions; resistant to moisture and mechanical damage. Only composite sashes keep consistently high quality for decades without the need of maintenance and painting.
- 3** Solid multi-layer construction provides stability of the sash and burglar protection. Sash linings made from the highest quality composite panels resistant to scratches and damage.
- 4** Waterproof composite frame protects the interior of the sash from moisture and freon-free insulation provides excellent protection against the heat loss.
- 5** The highest quality coatings in any RAL colours or in one of the many wood grain decorations combined with total resistance of composite doors to moisture makes them resistant in the extent of the reach of traditional materials.
- 6** Silicone seals designed specially for composite doors, provide maximum protection against heat loss around the perimeter and provide a pleasant sound when closing.
- 7** Low threshold's system with durable aluminium thermal barrier and thermal subliminal insulation profiles, provides comfort through excellent insulation and stable foundation door. The threshold height is only 20mm.
- 8** Heat-insulated threshold profiles with warm assembly system provide a stable positioning of door eliminates thermal bridges and protects against moisture and system of multi-point locks and anti-theft blockades raises the level of burglary protection.

Low threshold
only 20 mm
for your convenience

Burglary resistance RCII

ACCORDING TO THE STANDARD (PN-EN 1627:2011)

Because of design and top quality fittings - composite doors have excellent resistance to burglary, vandalism and mechanical damage.

U_p factor from 0,63 W/m²K

PASSIVE STANDARD

Why U_p factor is so important?

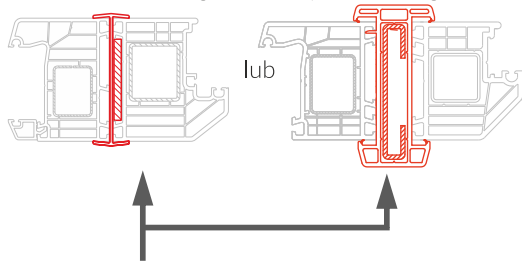

U_p - Coefficient of thermal insulation

The low value of this ratio ensures heat loss reduction in house and little power for energy to heating the house.

In Viking composite doors because of connection materials and components with perfect parameters we have the lowest coefficient of thermal insulation while maintaining an elegant appearance and optimum thickness of the door sash.

Static connector

with steel reinforcement provide construction stability allowing usage of large dimension sidelights and top transoms lights.

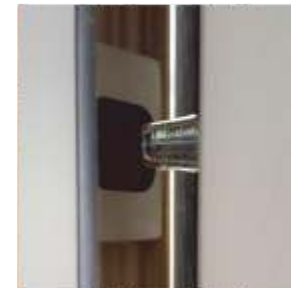

Multipoint locking system

Smart control

3D hinges

Anti-theft blockades

Triple-glass packets with Super Spacer bar

Silicone seals

Low aluminum threshold with thermal barrier and subthreshold profile

Wind-stop seal

INFORMATION SYSTEM ■ TECHNICAL PARAMETERS

-  Guarantee of the technical efficiency of the composite sash
-  Product meets the requirements of the European Union
-  Coefficient of thermal insulation barrier UD=X,XX W/m²K
-  Anti-burglar according to PN-EN 1627:2011
-  Soundproofing
-  The requirement of a full roofing
-  Sash thickness

-  Rebate system
-  Triple sealing system
-  Triple glazing units
-  Super Spacer warm edge between the glass
-  Handle locked strip locking system
-  Key-locked strip locking system
-  Key-locked automatic strip locking system

We constantly develop and improve production processes, so that you can decide on the final design and accessories of door of your dreams.

Bevels - the beauty of grinded glass

Swarovski - jewellery for your doors

Fusing - colours embedded onto glass

Resin - multiplicity of colours

LED lighting - bright accent of your home

Frozen and melted glass - individual style and charm

All glazings are decorated in our GLASS & STAINED GLASS STUDIO
the most beautiful styles - in standard and at the individual customer's request

Selected colours from RAL palette

Below, we present the colours most commonly chosen by our customers. Our customers have access to a full range of RAL (except for pearl, metallic and luminous) and they decide about the colour of their dream doors.

*Metallic and fluorescent colors available on an individual order.

NOWOŚĆ

Colours from RAL palette with PEARL effect

NOWOŚĆ

* Details on page 9 of the catalog - additional payment for the use of the pearl effect in the table of additional payments in the price list.

Wood grain colours

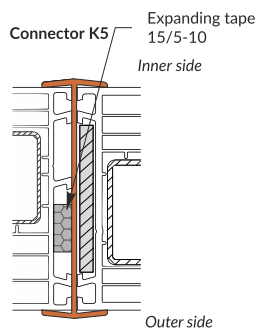

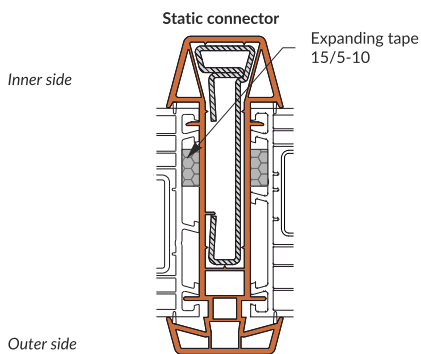

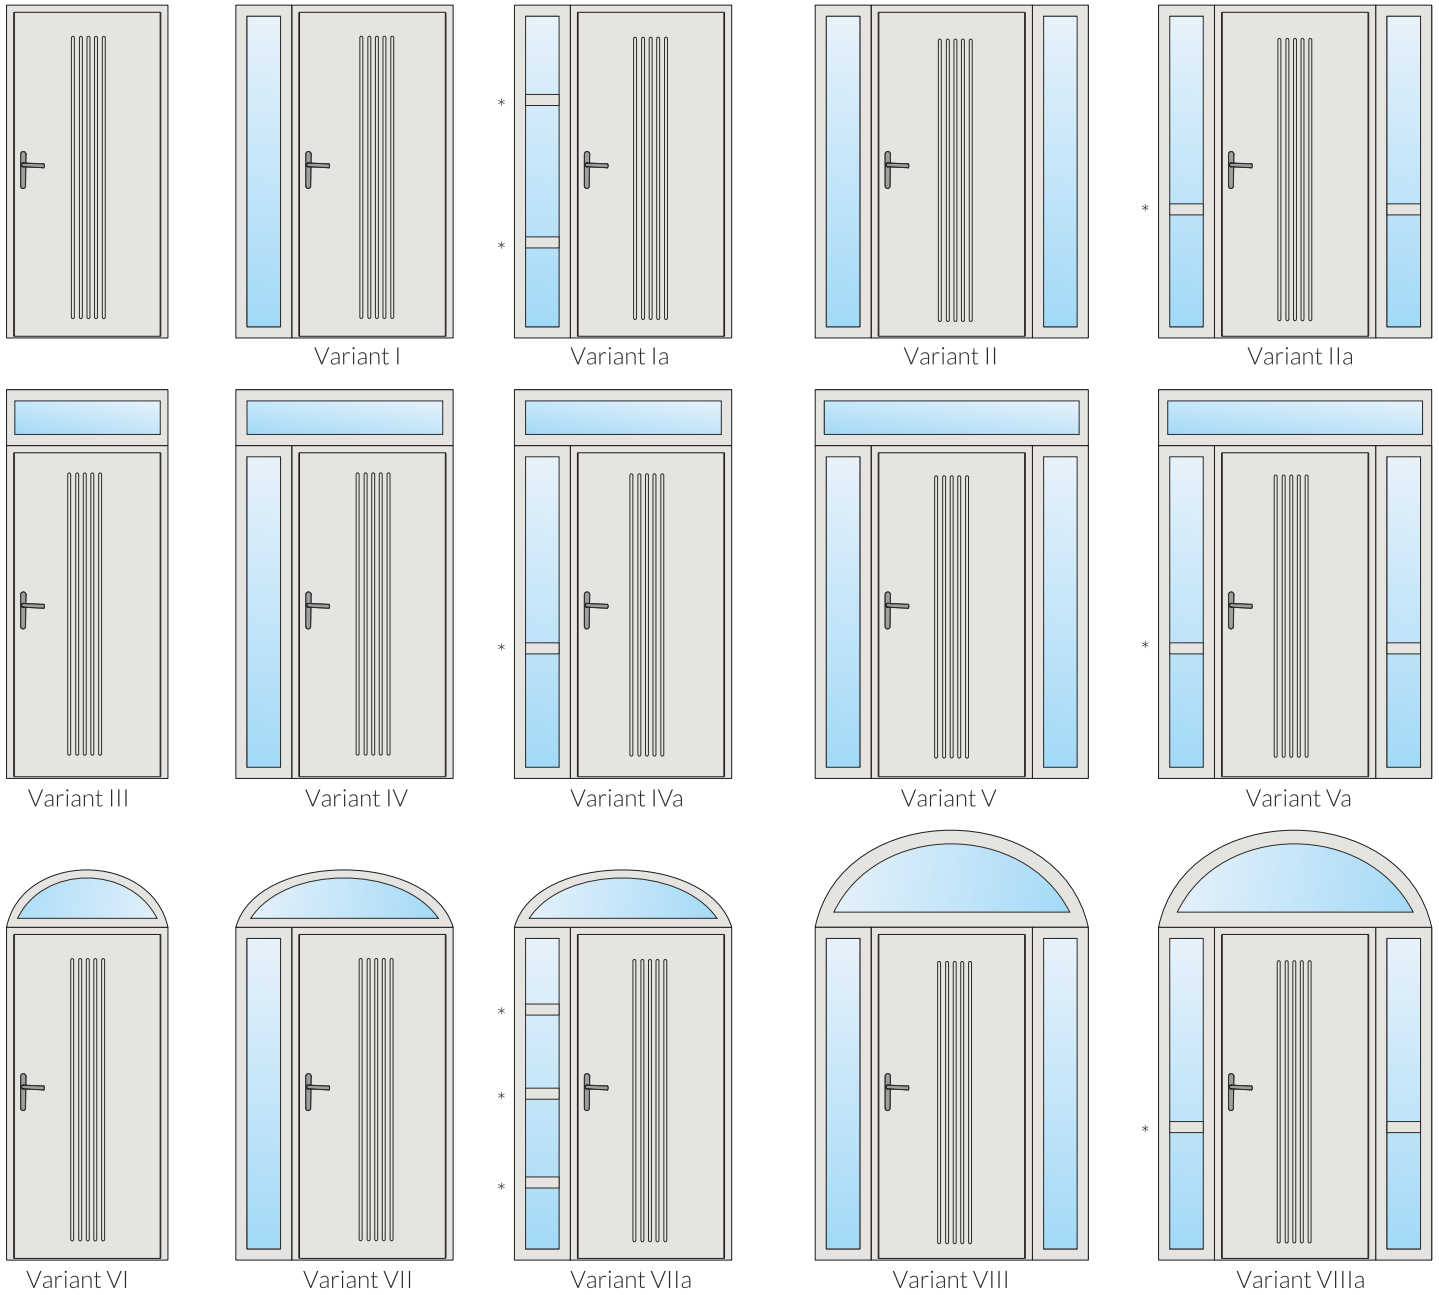

For lovers of precious wood colours, we offer from one of the many decorations created by our craftsmen with the highest qualifications.

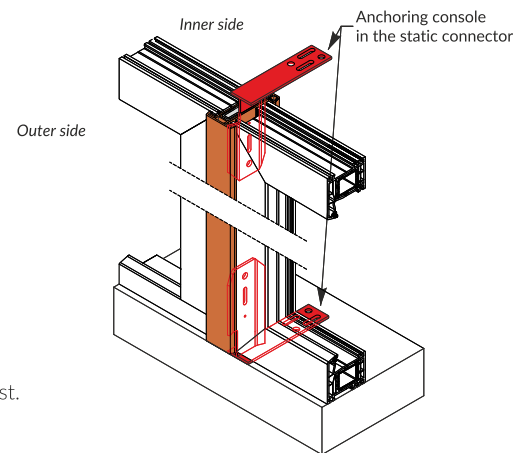

Composite doors VIKKING can be painted in two colours (divided into the outer side and an inner side), as well as several colours on each side.

Side lights and transoms variants - perfectly fitted to your needs

Perfect connection

The sidelights of composite doors are manufactured in any variants, sizes and decorations.
 * Sidelight lacing. The number and configuration of the lacings according to the order - optional, see price list.
 Types of sidelight fillings:

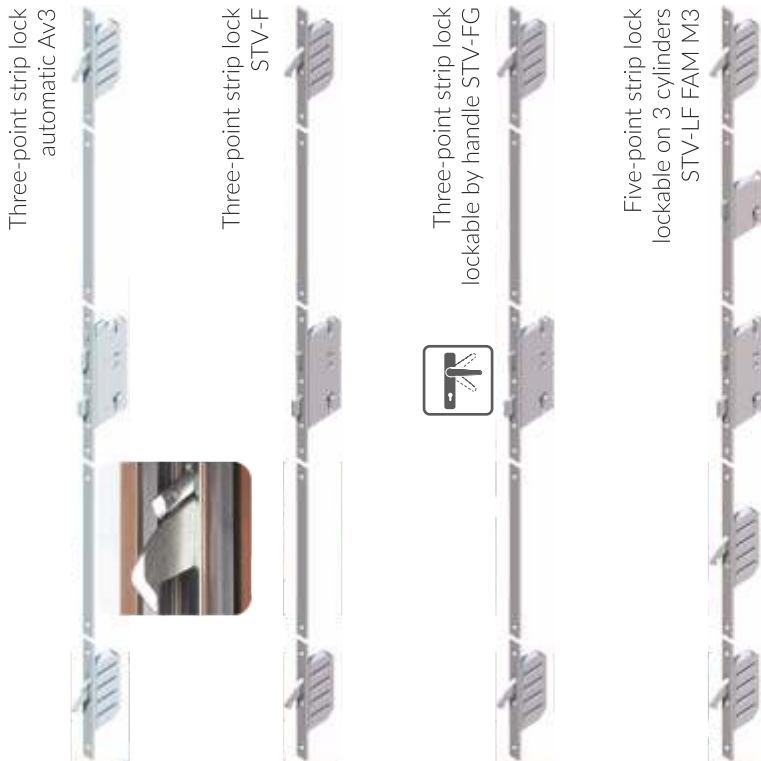

- triple glazed decorated glass unit in the design identical as stained glass of the sash,
 - filling with composite panel of the structure and colors identical with the door sash.
- Optional: composite panels filled with glazing unit in the design identical as stained glass of the sash - individual pricing.

Do you expect different shape? - we find together the optimal solution.
 Please contact with us: wyceny@vikking.eu

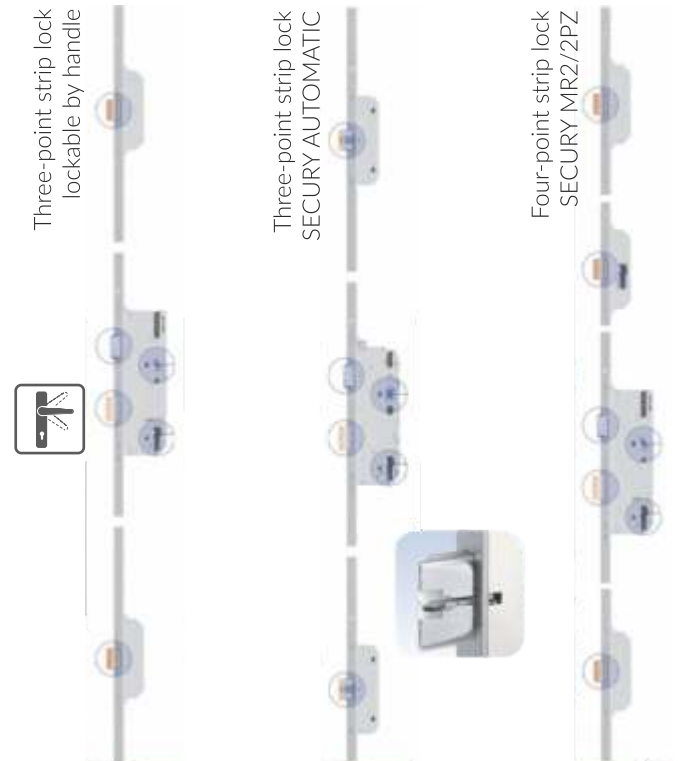

For your convenience and security all doors in rebate version stand out for the highest-quality multi-point, anti-theft strip locks.

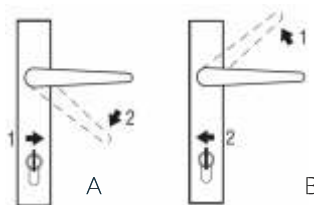

Locks dedicated to the lines: ARCTIC PLUS and ARCTIC

Locks dedicated to the PREMIUM line

Locking plate made of stainless steel

- * Locking with use of door handle
- A) Opening:
1. Unlock the door lock using the key.
 2. Open using a door handle.
- B) Closing:
1. Lock the door by lifting the handle up.
 2. Close using the key.

It is recommended to use a door closer to the electric door strike and the mechanical latch, which will protect the sash against opening due to draft.

AXA Solo Handle

DEDICATED FOR AXA AMSTERDAM HANDRAIL

NEW

Handle AXA Mars

Handle HOPPE with fingerprint reader

BioKey - Your biometric key

Fingerprint reader BioKey - Your biometric key

Put your @registered@ finger to the reader and slide it over the surface, and your door will open automatically. After you pass the threshold - built-in door pusher will take care of the immediate shut of the door, and automatic locking device will lock it again. If you want, you can unlock it using a key from outside and a handle from inside.

Fingerprint reader can be easily added to intelligent home system.

Just forget about a bunch of keys, incidentally locked door.

Glass keyboard with Bluetooth system.

The solution is very simple, which give you possibility to open your doors by the keyboard code or with telephone/smatphone with bluetooth function.

Lock operating in composite doors have never been so comfortable.

You don't need keys, use only telephone with bluetooth.

In the system you can have 6 phones and 18 numeric codes.

The keyboard cooperate with intelligent house system.

RFID is another fast and trouble-free door unlocking system. It is also possible to open the door with all already existing transponders such as: business access card, credit card, ATM card, tags, key rings etc. It is a radio wave system.

REALWOOD

ENERGY EFFICIENT WINDOWS

THE ONLY ONE **PVC** WINDOWS ON THE MARKET WITH **REAL WOOD** DECORATION

Unique decoration system made by our team of engineers, is the object of international patent protection.

PVC surface decoration in RW technology eliminate veneering profiles necessity and ensures durability for years.

Real Wood windows not require expensive maintenance opposite to wooden windows.

FIT PERFECTLY TO COMPOSITE DOORS

Innovative idea

Wooden products, during operation in the facilities are vulnerable to many threats from destructive effect of moisture on the hygroscopic wood construction. From here was born the idea of decorating the surface of PVC profiles, to provide them with the aesthetics of the fine wood and eliminate the effects and nuisance caused by the use of wood.

Innovative technology

The proprietary solution of structural glazing inserts prevents the sashes from falling, increases safety and comfort of use. It also allows you to optimize the steel reinforcements of window profiles, which greatly affects protection against the loss of valuable energy.

Decorated PVC profiles technology RealWood, unlike wood does not require care for protection against the weather. Any coatings repairs are also possible in the facility where windows are already mounted.

Innovative design

Developed by a team of VIKKING engineers proprietary technology is the subject of international patent protection. The attractiveness of the acquired visual effects provoked us also to reserve an international industrial design.

The surface of Real Wood window profiles resembles the surface of fine wood, but with no flaws that wood has. Real Wood decoration and varnishing can be made in any configuration. Real Wood windows, unlike veneer windows, always have all visible niches painted in a color identical to the color of the windows.

SPACE COMFORT

Terrace doors and windows systems:

- **tilt-turn:** the ability to use hinges discreetly hidden in the neutral rebate or magnetic sensors to monitor the positions of windows, climate control and operation of the hood and cooperating the alarm system.
- **tilt and slide:** comfortably system duoPort SK for large glazing, compatible with the latest trends. It ensures smooth operation and the possibility of increasing resistance to burglary.
- **retract and slide:** System duoPort PAS sliding doors gives a new dimension of functionality. The parallel withdrawal wings of the frame enables natural, energy-efficient ventilation, also in the absence of the household. The position of the parallel withdrawal wing fitting has the same class of burglary resistance as in the closed position.
- **HST lift and slide:** the possibility of making construction up to 6 meters wide. Thanks to the use of the highest quality fittings, the wings move freely and with respect to the unresolved parts of the structure freely and without the slightest resistance.

REVOLUTIONARY AIRING

Energy saving airing, without drafts.

Parallel positioning system 6 mm.

During the ventilation window meets the requirements of ENV 1627-1630 Class Rc2, which acts as a closed window shutters.

REALCOMFORT

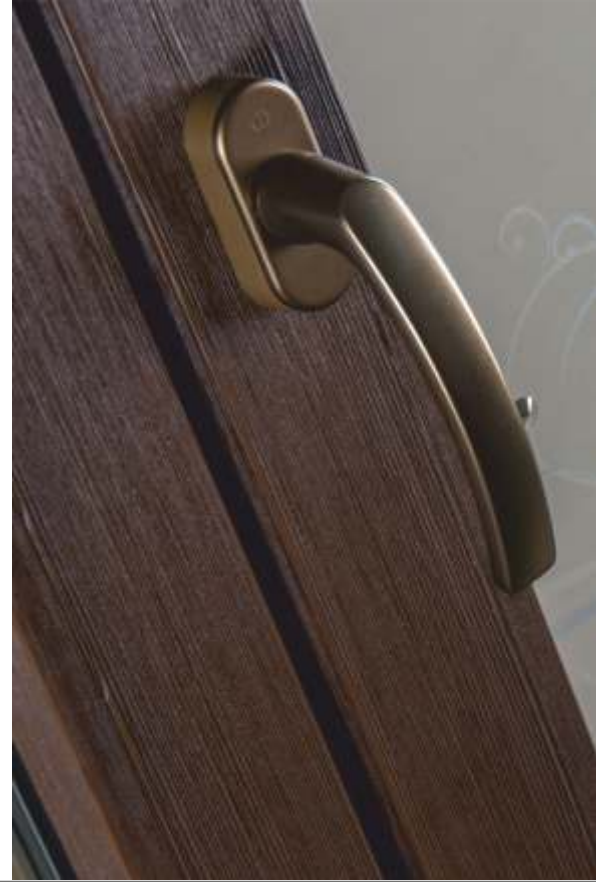

Innovative technologies.
Functional solutions.

Freedom of shapes

Rich choice of handles

Together we will choose the best solutions dedicated to your needs.

Align the windows to the functionality of premises in your house.

Innovative design.

Colouristics not available in other systems.
